INTRODUCTION

Astrology is a study of the connection between planets and life on Earth. It is based on a concept that energy patterns form between other planets and Earth; and that these energies affect our lives as individuals and communities.

An astrological chart, also known as a horoscope, natal chart, or birth chart, records the relationship between the planets and the signs of the Zodiac. Charts can be calculated for the birth of a person, a community, an event or anything that seems momentous. The horoscope is as individual and unique as a fingerprint.
